Automate-along with TinyFish.

Small business. Big moves.

The holidays are your busiest weeks. TinyFish is an extra pair of hands: you ask ChatGPT or Claude for a job in plain words, and TinyFish opens the websites, reads what's there and brings back the answer.

Less busywork, more business, more life.

$20

Psst, there's $20 hidden in here. We tucked a code into this packet in three parts, between the examples. Find all three, type them in order with no spaces, and enter the code at **agent.tinyfish.ai/live-events**. The details are in "This week's offers" near the end.

YOUR WEEK

Five days, one theme a day.

Follow along one day at a time. Each day has a few jobs to hand off, each with a prompt you can copy. By Friday, your favorites run on a schedule.

DAY 1 — Mon Nov 16
Know your competition before Black Friday P.05
Competitor ads, what a shopper pays on Amazon, a competitor's newest YouTube videos, a video summary, and your Instagram hashtag briefing

DAY 2 — Tue Nov 17
Get your store holiday-ready P.08
Your Amazon listing, your Squarespace pages and SEO drafts, your live form, and every question on a form

DAY 3 — Wed Nov 18
Keep every order moving P.11
The "Where's my order?" helper, delivered or stuck, ZIP+4 address checks, and failed Make runs

DAY 4 — Thu Nov 19
Catch problems before your customers do P.15
A weekly problem check, your YouTube channel, your email setup, GoHighLevel versions, and a new Jotform
LIVE SESSION · 11 AM ET

DAY 5 — Fri Nov 20
Hand it off and get your evenings back P.19
Setup, saved sign-ins, schedules, and a Monday competitor brief

NEW TO TINYFISH?

Set up in five minutes.
Follow these steps.

HUNTING FOR $20?

Three code parts are hidden between the examples.

BEFORE MONDAY · SETUP

Set up in five minutes.

Use TinyFish in ChatGPT, in Claude, or both. Either way, you connect it once with your TinyFish account.

IN CHATGPT

Add TinyFish to ChatGPT

1. Open docs.tinyfish.ai/plugins and click **Add TinyFish to ChatGPT**. The TinyFish plugin opens on chatgpt.com.
2. Tap **Install plugin**.
3. Sign in to TinyFish when the page opens. New here? Tap **Sign up**, and if you use your email, enter the code TinyFish sends you.
4. Tap **Allow** so ChatGPT can use your TinyFish account.
5. Start a new chat and paste a prompt from this week's guides.

IN CLAUDE

Add TinyFish to Claude

1. Open docs.tinyfish.ai/plugins and click **Add TinyFish to Claude**. The TinyFish connector opens in the Claude directory.
2. Tap **Connect**, then **Allow** on the accounts.tinyfish.ai page.
3. Start a new chat and paste a prompt from this week's guides.

Connect Gmail for the order helper

In ChatGPT, open **Settings**, then **Plugins**, and connect Gmail. In Claude, open **Settings**, then **Connectors**, and connect Gmail. Only one helper and the email draft need it.

Save a sign-in for the sites you use

Some checks read your own accounts, like YouTube Studio, Squarespace or Make. You sign in once in a TinyFish browser profile, and later runs start signed in. Your password goes to the site, not to ChatGPT or Claude.

1. Open **Browser Context Profiles** in the TinyFish dashboard.
2. Click **Create Profile**, give it a name, mark it as your default, and click **Create and set up**.
3. Sign in to the site in the setup browser that opens.
4. Save the setup session.

Sites still sign you out now and then, or ask for a code. If a check says you're not signed in, open the profile and sign in again.

Top up your wallet

Jobs that click through a site use agent steps, paid from your TinyFish wallet. Searching the web and reading a page you link to are free. This week, every top-up earns bonus credit.

1. Open your wallet at agent.tinyfish.ai/wallet, or click **Wallet** at the bottom of the menu in your TinyFish dashboard.
2. Click **Add money**.
3. Pick $10, $25, $50 or Other. The minimum is $10.
4. Click **Continue to checkout**, then pay in Stripe Checkout. If you pay by card, TinyFish saves it for your next top-up.
5. Your balance updates once the payment goes through.

After your first top-up, you can click **Enable auto-reload** on the same page, and your wallet refills when funds run low.

DAY 1 OF 5 · MONDAY · NOV 16

Know your competition before Black Friday.

Four checks, one prompt each. Copy a prompt, swap the parts in **[brackets]**, and paste it into a new chat in ChatGPT or Claude. No code required.

BEFORE YOU START

- [ ] Add TinyFish to ChatGPT or Claude. The steps are at docs.tinyfish.ai/plugins.
- [ ] For the Instagram check, save your Instagram sign-in in a TinyFish browser profile first. The other checks don't need a sign-in.

Stuck? If something goes sideways, "When something goes wrong" near the end of this packet has fixes.

See what a shopper pays on Amazon

COPY THIS PROMPT

Use TinyFish to inspect this exact Amazon.com listing: **[product URL]**. Report the selected ASIN and variant, title, brand, current purchase price, sold-by and ships-from names, dimensions and visible specifications. Distinguish the purchase price from list prices and card-application promotions. If the purchase price is not verifiable, say so. Read-only: do not sign in, add to cart or buy.

YOU GET BACK

- The ASIN, variant, title and brand.
- Who sells it and who ships it.
- The purchase price, kept apart from list prices and card offers.
- The dimensions and specs on the page.

TIP One product link per ask. To check your own listing's content, see Tuesday's guide.

See the ads they're running right now

COPY THIS PROMPT

Use TinyFish to open the Meta Ad Library, search active ads from **[competitor or keyword]** in **[country]**, and list 10 ads with advertiser, ad copy, format (video/image/carousel) and start date.

YOU GET BACK

- The advertiser, format and start date for each active ad.
- If it finds fewer than 10 that fit, it says so instead of padding the list.
- Each ad's copy and headline.

TIP Keep it to 10 ads. Longer lists can run out of steps. New ads can take up to 24 hours to show up in the Ad Library.

PSST · CODE PART 1 OF 3

Keep it for the $20 offer in "This week's offers".

TF

See what's working on their YouTube channel

COPY THIS PROMPT

Use TinyFish to open the YouTube channel **[competitor]**, list its 12 newest videos with title, link, views and upload date, and tell me which topics get the most views.

YOU GET BACK

- The 12 newest videos, with title, link, views and upload date.
- Which topics get the most views.

Want the highlights of one video? Paste this one:

COPY THIS PROMPT

Use TinyFish to open this YouTube video **[link]**, open the transcript, and give me a timestamped summary of the key points plus anything it says about **[topic]**. No sign-in needed.

Get post ideas from your own hashtag

NEEDS · YOUR SAVED INSTAGRAM SIGN-IN

COPY THIS PROMPT

Use TinyFish with my saved Instagram login to open the hashtag page for **[#yourhashtag]** and put together a short briefing for my account, **[@yourhandle]**. I'm a **[your business, such as a family photographer in your city]**.
Read-only: don't like, comment, follow, message, post or change settings, and don't open my home feed. Look at about 10 posts or Reels shown on the hashtag page. Open a post only to confirm a detail, and don't keep scrolling or reloading.
For each post you mention, give the handle, the direct link, whether it's a post, carousel or Reel, the date if Instagram shows one, what the post shows, its hook, and any visible likes or comments. Never guess a handle, link, date or number; say "not shown" instead. Don't assume posts near the top are the newest.
Then give me:
1. Up to 5 posts worth watching, and why each matters to my account.
2. Patterns in styles, captions and seasonal themes, kept apart from one-off examples.
3. 2 or 3 posts worth a genuine comment, with an angle for each. No "Beautiful photo!"
4. 2 or 3 post ideas for my account, each with a format, an opening hook and an optional call to action.
5. Anything you couldn't see or confirm.

YOU GET BACK

- Up to 5 posts worth watching, and why each matters to you.
- Patterns in styles, captions and seasonal themes.
- 2 or 3 posts worth a genuine comment, with an angle for each.
- 2 or 3 post ideas for your account, each with a format, an opening hook and a call to action.
- Anything it couldn't see or confirm.

TIP It only reads. It won't like, follow, comment or message anyone, and once a day is plenty.

DAY 2 OF 5 · TUESDAY · NOV 17

Get your store holiday-ready.

Five checks, one prompt each. Copy a prompt, swap the parts in **[brackets]**, and paste it into a new chat in ChatGPT or Claude. No code required.

BEFORE YOU START

- [ ] Add TinyFish to ChatGPT or Claude. The steps are at docs.tinyfish.ai/plugins.
- [ ] The two Squarespace checks need your Squarespace sign-in saved in a TinyFish browser profile. The other three don't need a sign-in.

Stuck? If ChatGPT says your profile isn't signed in, see "When something goes wrong" near the end of this packet.

Check your Amazon listing like a shopper

COPY THIS PROMPT

Use TinyFish to inspect this Amazon.com product page: **[URL]**. Return its title, bullet points, product gallery image URLs and A+ content text and image URLs, with the sections clearly identified. Record any inconsistency in the copy and mark missing content. You may click an ordinary Continue shopping button; stop at a CAPTCHA or access restriction. Don't sign in, add to cart or buy.

YOU GET BACK

- Your title, bullet points, gallery image links and A+ content, each section labeled.
- Anything missing.
- Any place the copy doesn't agree with itself.

TIP One listing per ask. If Amazon shows a CAPTCHA, TinyFish stops there.

See every page on your site

NEEDS · YOUR SAVED SQUARESPACE SIGN-IN

COPY THIS PROMPT

Use TinyFish with my saved Squarespace login to open the Pages panel for my site and inspect the page tree only. Don't make changes. List the pages in order under Main Navigation and Not Linked, and say whether pages named About, Shop and Contact exist and where.

YOU GET BACK

- Your pages in order, under Main Navigation and Not Linked.
- Whether pages named About, Shop and Contact exist, and where.

TIP It only looks. It won't move, hide or change a page.

Refresh your SEO titles and descriptions, as drafts

NEEDS · YOUR SAVED SQUARESPACE SIGN-IN

Swap in your own pages, titles and descriptions.

COPY THIS PROMPT

Use TinyFish with my saved squarespace.com login to set the SEO title and meta description for these pages:
1. /about: SEO title "About Us | Harbor Coffee Roasters", meta description "Small-batch coffee roasted in Portland since 2014. Meet our team and learn how we source our beans."
2. /shop: SEO title "Shop Fresh Roasted Coffee | Harbor Coffee Roasters", meta description "Order single-origin beans and blends, roasted to order and shipped within 48 hours."
Save as drafts only and don't publish anything.

YOU GET BACK

A confirmation for each page that its new title and description are saved as drafts.

TIP Open each page's settings in Squarespace and check the draft before you publish. SEO edits don't always stick.

PSST · CODE PART 2 OF 3
Keep it for the $20 offer in "This week's offers".

NOV

Check your live form before you share it

COPY THIS PROMPT

Use TinyFish to do a read-only final QA of the live Jotform form **[your form link]**. Inspect the public form from top to bottom and verify the heading (**[your form's heading]**), the required fields, that no unexpected questions appear before Submit, the submit button, and **[the services prompt text]**. Don't submit an entry or change the form.

YOU GET BACK

- The heading, checked against the one you gave it.
- The required fields.
- Any question before Submit that you didn't expect.
- The submit button, and the text you asked it to check.

TIP It never types an answer or submits the form.

See every question on a form

COPY THIS PROMPT

Use TinyFish to open this form **[URL]** and list every question in order with answer type, options and whether it's required, plus any deadline or file upload. Don't type answers or submit.

YOU GET BACK

- Every question in order, with its answer type and options.
- Which questions are required.
- Any deadline or file upload.

TIP Long multi-page forms can come back partial. If that happens, ask for one page at a time.

DAY 3 OF 5 · WEDNESDAY · NOV 18

Keep every order moving.

One prompt reads your inbox, checks USPS with TinyFish and saves the replies in your Gmail drafts. You review them and hit send. Swap the parts in **[brackets]**, and paste it into a new chat in ChatGPT or Claude. No code required.

BEFORE YOU START

- [ ] Add TinyFish to ChatGPT or Claude. The steps are at docs.tinyfish.ai/plugins.
- [ ] Connect Gmail. In ChatGPT, open Settings, then Plugins, and connect Gmail. In Claude, open Settings, then Connectors, and connect Gmail.
- [ ] Running it on a schedule needs a paid Claude plan, or a ChatGPT plan that includes scheduled tasks.
- [ ] The Make check needs your Make sign-in saved in a TinyFish browser profile. The USPS checks don't need a sign-in.

Stuck? If ChatGPT says your profile isn't signed in, see "When something goes wrong" near the end of this packet.

THE HELPER IN THREE STEPS

1 Try the helper once → 2 Put it on a schedule → 3 Review and hit send

1 Try the helper once

NEEDS · GMAIL CONNECTED

COPY THIS PROMPT

Check my Gmail for customer emails from the last **[24 hours]** that ask where their order is, like "Where's my order?", "Has it shipped?" or "It hasn't arrived."
For each one, find the USPS tracking number for that order in my Gmail, in the same thread or in my shipping confirmation or label receipt for that customer. If you can't find one, don't guess. Add that customer to a "Needs you" list.
Check up to 4 packages, one at a time. For each one, use TinyFish to check USPS tracking for that tracking number. Give me the current status, the latest scan with date, time and location, and the estimated delivery date. Don't sign in or change anything.
Then save a reply to each customer as a Gmail draft in the same thread. Keep it short and warm, include the status, the latest scan and the estimated delivery date, and sign it **[your name]**. If USPS shows a delay or a problem, say I'm keeping an eye on it, and don't promise a date.
Don't send anything. When you're done, list the drafts you saved, each package's status, the "Needs you" list, and anyone you didn't get to.

YOU GET BACK

- A reply draft in each customer's Gmail thread, with the status, the latest scan and the estimated delivery date.
- A short summary: the drafts it saved, each package's status, your “Needs you” list, and anyone it didn't get to.

TIP Open your Gmail drafts and read them first. If a reply doesn't sound like you, add a line to the prompt, like “Start with Hi and their first name” or “Keep it to two sentences.”

2 Put it on a schedule

Once the drafts look right, add this line to the top of the prompt, and paste it into a new chat:

ADD TO THE TOP

Run this every weekday at **[8 AM]**.

TIP Scheduling steps for ChatGPT and Claude are in Friday's section.

3 Review and hit send

Each morning, open your Gmail drafts. Read each reply, fix anything that needs your touch, and hit send. Then check the summary for your "Needs you" list.

When a customer messages you somewhere else

Messages from Instagram, Etsy or Facebook don't come through Gmail. Paste them in instead:

COPY THIS PROMPT

Use TinyFish to check USPS tracking for **[tracking number]**. Give me the current status, the latest scan with date, time and location, and the estimated delivery date. Don't sign in or change anything.
Then write a short, warm reply to this message from my customer that I can paste back, signed **[your name]**. If USPS shows a delay or a problem, don't promise a date:
[Paste the customer's message here.]

YOU GET BACK

The package status and a reply you can paste right back.

PSST · CODE PART 3 OF 3

Keep it for the $20 offer in "This week's offers".

SBW

See whether it was delivered, or what's holding it up

COPY THIS PROMPT

Use TinyFish to see whether USPS shows package **[tracking number]** as delivered. If yes, give me the date, time and location; if not, tell me the latest scan and any delay, customs hold or exception.

YOU GET BACK

- If it was delivered: the date, time and location.
- If not: the latest scan, and any delay, customs hold or exception.

Check an address before you ship

COPY THIS PROMPT

Use TinyFish to check this address on the USPS ZIP Code Lookup: **[street, suite, city, state]**. Give me the standardized address with ZIP+4, or tell me if USPS can't find a match.

YOU GET BACK

- The address in USPS's standard form, with its ZIP+4.
- Or a note that USPS can't find a match.

TIP If USPS can't match the address, check it with your customer before you print the label.

Find the automation that broke

NEEDS · YOUR SAVED MAKE SIGN-IN

COPY THIS PROMPT

Use my saved login to check my Make account for errors. List failed runs from the last **[N]** days with the failing step and error message. Read-only: don't edit or rerun anything.

YOU GET BACK

- Each failed run in that window.
- The step that failed, and its error message.

TIP Start with 7 days. A long run history can come back partial. It won't edit or rerun anything.

DAY 4 OF 5 · THURSDAY · NOV 19

LIVE SESSION TODAY · 11 AM ET

Catch problems before your customers do.

A weekly check that tells you only what needs you, plus four checks you can run anytime. Swap the parts in **[brackets]**, and paste a prompt into a new chat in ChatGPT or Claude. No code required.

BEFORE YOU START

- [ ] Add TinyFish to ChatGPT or Claude. The steps are at docs.tinyfish.ai/plugins.
- [ ] Save your sign-in for each site you'll check in a TinyFish browser profile: YouTube Studio, Squarespace, GoHighLevel or Jotform. "Save a sign-in for the sites you use" in the setup section walks you through it.
- [ ] Running it on a schedule needs a paid Claude plan, or a ChatGPT plan that includes scheduled tasks.
- [ ] The email draft needs Gmail connected in ChatGPT or Claude.

Set up your weekly problem check

NEEDS · SAVED SIGN-INS FOR THE SITES YOU CHECK

COPY THIS PROMPT

Run these checks one at a time, then tell me only what needs my attention.
Check 1: Use TinyFish with my saved YouTube Studio login to list my last **[number]** videos with status (public, scheduled, draft), any copyright or restriction notices, and unanswered comments. Read-only.
Check 2: Use TinyFish with my saved Squarespace login to list the DNS records for **[your domain]**. Read-only: show each record's type, host and value, and flag anything missing for email or my website.
Start with one line: all clear, or how many things need me. Then list each problem, most urgent first, with what to do about it in plain words. For each unanswered comment, draft a short, warm reply I can paste. Don't post, reply, publish or change anything.

YOU GET BACK

- One line up top: all clear, or how many things need you.
- A reply drafted for each unanswered comment, ready to paste.
- Each problem, most urgent first, with what to do about it in plain words.

TIP Use GoHighLevel or Jotform instead? Swap in that check's prompt from below. Start with two checks per run.

Then run it every week

When it looks right, add this line to the top, and paste it into a new chat:

ADD TO THE TOP

Run this every **[Monday]** at **[8 AM]**.

TIP Scheduling steps for ChatGPT and Claude are in Friday's section.

Catch up on your YouTube channel

NEEDS · YOUR SAVED YOUTUBE STUDIO SIGN-IN

COPY THIS PROMPT

Use TinyFish with my saved YouTube Studio login to list my last **[number]** videos with status (public, scheduled, draft), any copyright or restriction notices, and unanswered comments. Read-only.

YOU GET BACK

- Your latest videos, each marked public, scheduled or draft.
- Any copyright or restriction notices.
- Comments that haven't had a reply.

Want the replies drafted too? Add this to the end:

ADD TO THE END

Then draft a short, warm reply to each unanswered comment that I can paste in YouTube Studio. Don't post anything.

TIP If your Google account has more than one channel, name the one you mean.

Check your email setup

NEEDS · YOUR SAVED SQUARESPACE SIGN-IN

COPY THIS PROMPT

Use TinyFish with my saved Squarespace login to list the DNS records for **[your domain]**. Read-only: show each record's type, host and value, and flag anything missing for email or my website.

YOU GET BACK

- Each DNS record, with its type, host and value.
- Anything missing for email or your website.

Want help fixing it? Add this to the end:

ADD TO THE END

Then explain what's missing in plain words, and draft a short email to **[your web person]** asking them to add it. Save it as a Gmail draft, and don't send it.

TIP The draft needs Gmail connected. It never changes a DNS record.

See which GoHighLevel workflow version is live

NEEDS · YOUR SAVED GOHIGHLEVEL SIGN-IN

COPY THIS PROMPT

Use TinyFish with my saved GoHighLevel login to open the **[workflow name]** workflow, read-only. Confirm its status and current version, open Version History, and list each retained version with its status and timestamp and which one is live. Don't save, publish, restore, revert, test or edit anything. If an unsaved-changes prompt appears, stop without saving or discarding.

YOU GET BACK

- The workflow's status and current version.
- Each saved version, with its status and timestamp, and which one is live.

TIP If an unsaved-changes prompt appears, it stops without saving or discarding.

Double-check a new form before you share it

NEEDS · YOUR SAVED JOTFORM SIGN-IN

COPY THIS PROMPT

Use TinyFish with my saved Jotform login to open **[your form's builder link]** and verify the newly created form only. Confirm its exact title, first question and options, the fields present, and any visible conditional logic. Don't publish, submit, send messages, edit anything or open any other form. Report every difference between the structure I asked for (**[the questions you asked for]**) and what the builder actually shows.

YOU GET BACK

- The form's exact title, first question and options.
- The fields on the form, and any conditional logic it can see.
- Every difference between what you asked for and what the builder shows.

TIP Then run Tuesday's live form check before you share the link.

DAY 5 OF 5 · FRIDAY · NOV 20

Hand it off and get your evenings back.

Setup, saved sign-ins, schedules, and a Monday competitor brief.

Put any check on a schedule

Try a prompt by hand first. When the answer looks right, add this line to the top, and paste it into a new chat:

ADD TO THE TOP

Run this every **[Monday]** at **[7 AM]**.

- **In ChatGPT**, this sets up a scheduled task. Set it up in your browser if you want it to keep running when your laptop is off.
- **In Claude**, review the schedule it suggests and click **Schedule**. It runs even when your computer is asleep. You can pause it, change it or run it now under Scheduled in the sidebar.

TIP Scheduling needs a paid Claude plan, or a ChatGPT plan that includes scheduled tasks.

Your Monday competitor brief

COPY THIS PROMPT, THEN PUT IT ON A SCHEDULE

Put together my competitor brief. Run these one at a time:
Check 1: Use TinyFish to open the Meta Ad Library, search active ads from **[competitor or keyword]** in **[country]**, and list 10 ads with advertiser, ad copy, format (video/image/carousel) and start date.
Check 2: Use TinyFish to open the YouTube channel **[competitor]**, list its 12 newest videos with title, link, views and upload date, and tell me which topics get the most views.
Then give me a short brief: what they're pushing right now, and three ideas I could try this week. Keep it under 200 words.

YOU GET BACK, EVERY MONDAY

- What your competitor is advertising, and their newest videos.
- Three ideas for your own week, in under 200 words.

TIP Keep it to one competitor per brief. Longer lists can run out of steps.

Your order replies and your problem check

The “Where's my order?” helper is in Wednesday's section, and the weekly problem check is in Thursday's section. Both sections show you how to put them on a schedule.

WEEK RECAP

The week's best prompts.

If you only try five, try these.

DAY 1 Mon Nov 16	See the ads a competitor is running right now	MONDAY · P.05
DAY 2 Tue Nov 17	Check your own Amazon listing like a shopper	TUESDAY · P.08
DAY 3 Wed Nov 18	Let "Where's my order?" replies draft themselves	WEDNESDAY · P.11
DAY 4 Thu Nov 19	Get a weekly note on what needs you	THURSDAY · P.15
DAY 5 Fri Nov 20	Get a competitor brief every Monday	FRIDAY · P.19

EXTRAS

More jobs you can hand off.

This one passed testing too, but it doesn't belong to a day. Swap the parts in **[brackets]**.

Kleinanzeigen

Check whether a listing on Kleinanzeigen, Germany's classifieds site, is still available.

COPY THIS PROMPT

Use TinyFish to open this Kleinanzeigen listing **[listing link]** and tell me if it's still available, plus the price, shipping option and condition. Don't log in or message anyone.

PLAN THE SEASON

Your holiday checklist.

DATE	WHAT'S HAPPENING	A JOB TO HAND OFF
Thu Nov 19, 11 AM ET	The Small Business Week live session. Every registrant gets the replay.	Bring the job that eats your evenings.
The week before Black Friday	Prices and promos are moving.	Check competitor ads and Amazon listings.
Fri Nov 27	Black Friday	Track orders and answer "where's my order?"
Sat Nov 28	Small Business Saturday	Check your forms before you share them.
Mon Nov 30	Cyber Monday, and the last day of this week's offers	Last day for the top-up bonus.
Thu Dec 17	USPS Ground Advantage and First-Class Mail ship-by date	Clean up addresses with ZIP+4.
Fri Dec 18	USPS Priority Mail ship-by date	Track what's still on its way.
Sat Dec 19	USPS Priority Mail Express ship-by date	Check anything marked delayed.

The USPS dates are for delivery by Dec 25 within the lower 48 states, from the USPS announcement. Check UPS and FedEx dates on their own sites.

OFFERS

This week's offers.

$20 in credit

UNTIL THU NOV 19, 12 PM ET

1. Find the three code parts hidden between the examples in this packet.
2. Type them in order, with no spaces.
3. Go to agent.tinyfish.ai/live-events, enter the code as the event password, and follow the steps to claim your credit.

It works for new and existing accounts. Coming to the live session on Thu Nov 19? We'll give you the code there too.

Top-up bonus

MON NOV 16 – MON NOV 30

Extra credit on every top-up, and it grows with each one.

15%	30%	50%	50%
First top-up	Second top-up	Third and each one after	Every auto-reload

For example: a $100 first top-up gives you $115 in credit.

HELP

When something goes wrong.

It says your profile isn't signed in, but you signed in.	This is a known issue on Squarespace, GoHighLevel and Jotform, and a fix is in progress. To work around, try replying "Yes, use my default profile".
It asks about a step limit before it starts.	Tell it to break the task into individual components and parts.
A list stops partway.	Ask for fewer items, such as 10 ads or 12 videos, or one form page at a time.
A site asks you to sign in again or enter a code.	Open your browser profile and sign in once more.
The site shows a CAPTCHA or a bot check.	TinyFish can't get past some of these. Try again later.
Something in the answer looks off.	Open the page and check it before you act on it.

Need help?

Email support@tinyfish.ai. Setup guides are at docs.tinyfish.ai/plugins.
